12 Closing vision

1. PROBLEM & MARKET OPPORTUNITY

AGRICULTURAL RESIDUE

Banana pseudostem is an underutilized by-product after harvest.

Farmers receive limited value from the residue.

CONSUMER NEED

Demand opportunity for convenient, fibre-rich food ingredients and products.

BUSINESS GAP

Existing banana-stem powder products validate the idea, but the market is fragmented.

Banana harvest

Pseudostem

Food-grade processing

Fibre + foods

Consumer value

RESEARCH SIGNAL

Published research has reported meaningful dietary-fibre content in banana pseudostem.

2. OUR SOLUTION & PRODUCT PORTFOLIO

★ **STEMBITE Fibre+**

Flagship fibre powder

STEMBITE Flour+

High-fibre flour blend

STEMBITE Mix

Functional food mix

STEMBITE Bites

Fibre-enriched biscuits

STEMBITE Pro

B2B food-grade fibre

PRODUCT ROADMAP

Year 1: Powder + Flour | Year 2: Biscuits + Mix | Year 3: B2B ingredient scale-up

3. BUSINESS MODEL & SUPPLY CHAIN

4. MARKET & COMPETITION

MARKET REALITY

Banana-stem powder is already available in India. We compete through better positioning—not a “first ever” claim.

OUR EDGE

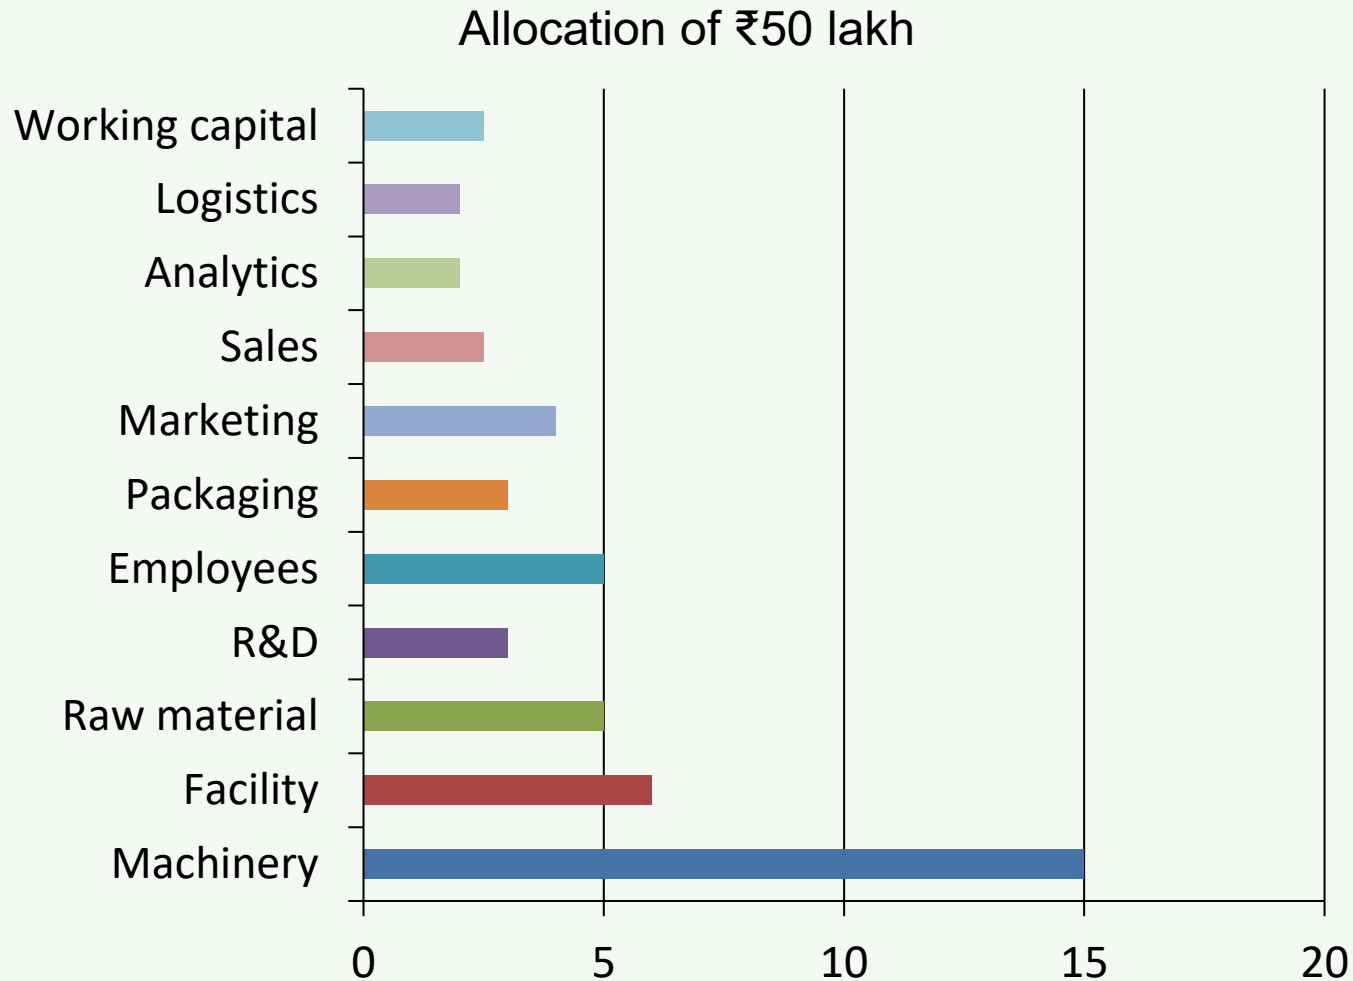

Food-grade
Multi-product
Farmer-linked
B2B + B2C

Existing powder brands	Powder / wellness	Standardized food-grade portfolio
Herbal/wellness sellers	Traditional positioning	Modern food + traceability
High-fibre food brands	Conventional ingredients	Agri-waste-based fibre story
Bakeries / manufacturers	Alternative ingredients	B2B fibre supply + farmer network

6. MARKETING STRATEGY

Campaign: WASTE SE WELLNESS

TARGET

Health-conscious consumers
Fitness & wellness
Families
Bakeries & food manufacturers

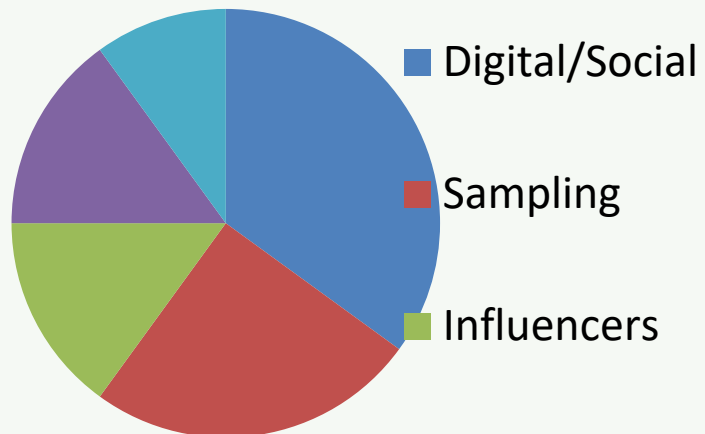

MESSAGE

Agricultural waste
→ Food-grade fibre
→ Convenient nutrition

FUNNEL

Awareness → Trial → Purchase → Repeat → Loyalty

₹4 lakh marketing budget

KPI DASHBOARD

CAC — Customer Acquisition Cost

Conversion rate — % of prospects who buy

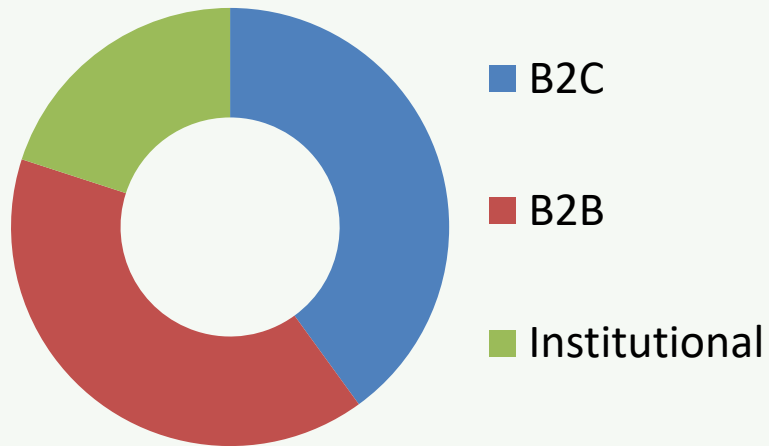

Repeat purchase rate — retention

Marketing ROI — return from marketing spend

7. SALES STRATEGY + DATA ANALYTICS

Target sales mix

SALES CHANNELS

B2C: website, e-commerce, supermarkets
B2B: bakeries, food manufacturers
Institutional: specialty retail

DATA INPUTS

Farmer: supply
Production: yield & wastage
Customer: preference
Sales: channel & demand

Data collection

Analysis

Forecast

Decision

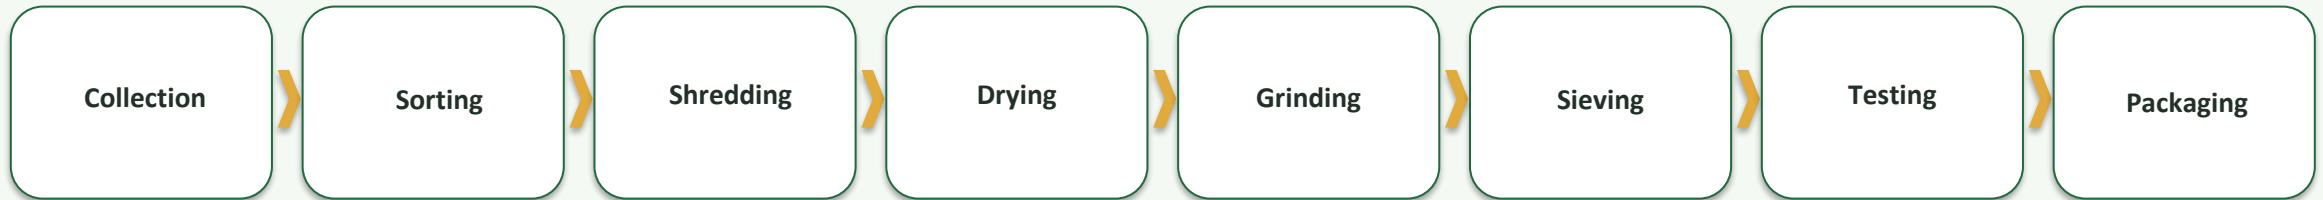

Profit

DATA-DRIVEN EDGE

Demand forecasting → production planning → procurement → inventory control → lower wastage

8. OPERATIONS, R&D & QUALITY

R&D

R&D = Research & Development

- Fibre consistency
- Product formulation
- Shelf-life testing
- Packaging improvement
- New product development

QUALITY

- Raw-material checks
- Batch testing
- Hygiene & traceability
- Standardized processing
- Food-grade packaging

COMPLIANCE

FSSAI = Food Safety and Standards Authority of India

Applicable licensing/registration, standards, labelling and claims requirements must be followed.

NO UNSUPPORTED HEALTH CLAIMS

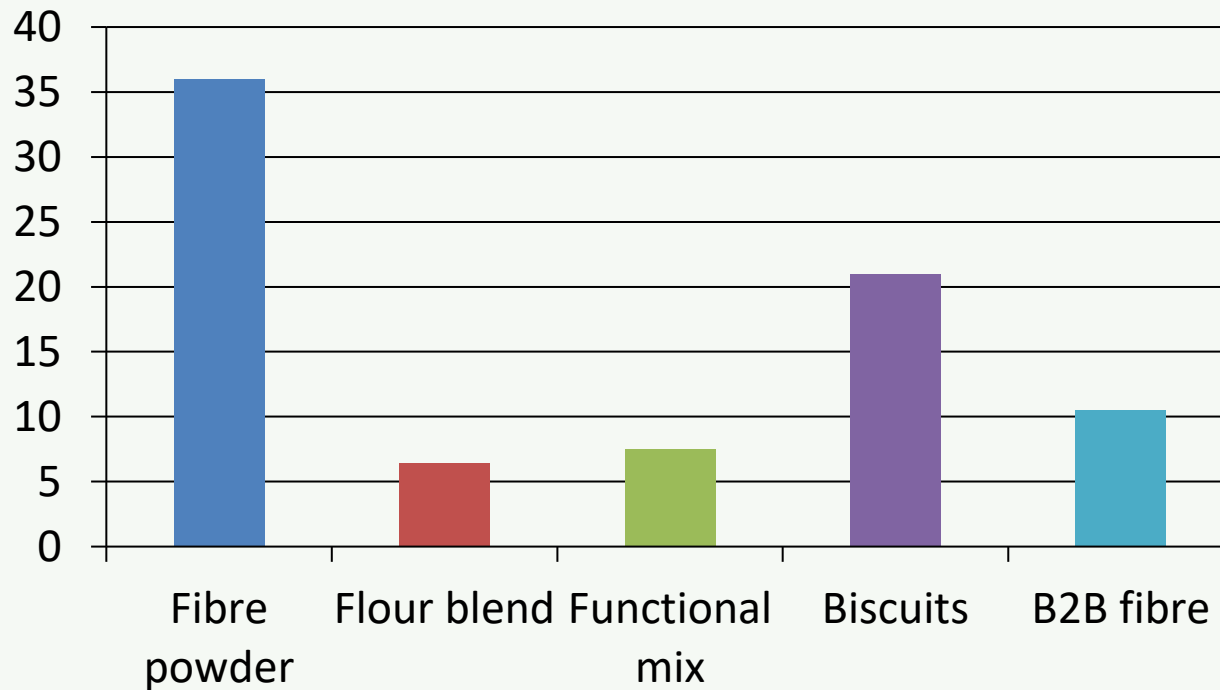

Use only substantiated and legally permitted nutrition/health claims.

9. YEAR-1 FINANCIAL PROJECTION

Illustrative management projections

Projected revenue by product

BREAK-EVEN

≈ ₹42–43 lakh annual revenue

REVENUE

₹81.4 L

COGS

₹44.2 L
